of a frall and delicate construction, are recommended by other manufacturers. Such machines are made to catch the eye, net to perform substantial work. The truth is, family sewing machines ought to be much stronger than any other, because they go into less skillful hands than when sold to manufacturers, and are used for a greater variety of work. The machines are used for a greater variety of work. The machines which have proved best for all other purposes must be best for family use, and they are Singer's. The speed of our machines has lately been doubled. No ther can compare with them in quantity of work.

New machines of the latest improved style will be exchanged on liberal terms for old sewing machines of our own make, or for operative machines of other manufactur-ers. Local agents wanted to sell our machines. N. B.—All persons desiring full information about sewing machines, can obtain it by applying for a copy of "I. M.
